

**The City of Fresno
Draft Master Environmental Impact Report
for the 2025 Fresno General Plan
EIR No. 10130
SCH Log No. 2001071097**

**Appendix 1 – Organizations and Persons Consulted
(Notice of Preparation)**

NOTICE OF PREPARATION

To: State Agencies
Responsible Agencies
Local and Public Agencies
Trustee Agencies
Interested Parties

From: City of Fresno
Development Department
2600 Fresno Street, Room 3043
Fresno, CA 93721-3604

**Subject: 1. Notice of Preparation of a Draft Environmental Impact Report
Pursuant to the Requirements of the California Environmental
Quality Act (CEQA)
2. Notice of Information/Scoping Meeting**

The City of Fresno Development Department will be the Lead Agency and will prepare an environmental impact report (EIR) for the project identified below. We need to know the views of your agency as to the scope and content of the environmental information which is germane to your agency's statutory responsibilities in connection with the proposed project. Your agency will need to use the EIR prepared by our agency when considering your permit or other approval for the project.

The project description, and location, and the probable/potential environmental effects are contained in the attached materials. A copy of the Initial Study is attached.

Due to the time limits mandated by State law, your response must be sent at the earliest possible date but not later than thirty (30) days after receipt of this notice which date is anticipated to be August 20, 2001.

A PUBLIC INFORMATION/SCOPING MEETING IS SCHEDULED TO BE HELD AT FRESNO CITY HALL, COUNCIL CHAMBERS, 2ND FLOOR, 2600 FRESNO STREET, AT 6:00 P.M. ON THURSDAY, AUGUST 2, 2001. ALL INTERESTED AGENCIES, PARTIES AND THE GENERAL PUBLIC ARE INVITED TO ATTEND.

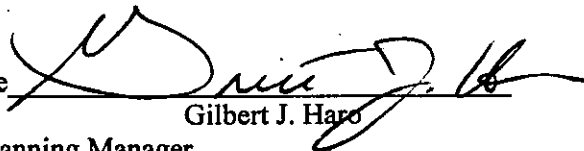

Please send your response to Gilbert J. Haro, Planning Manager, at the address shown above. We will need the name for a contact person in your agency.

Project Title: Draft 2025 Fresno General Plan

Project Applicant: City Of Fresno

Date 07.17.01

Signature

Gilbert J. Haro

Title: Planning Manager

Telephone: (559) 498-4441

Reference: California code of Regulations, Title 14, (CEQA Guidelines) Sections 15082, 15103, 15375.

**INITIAL STUDY/NOTICE OF ENVIRONMENTAL IMPACT REPORT
PREPARATION
DRAFT 2025 FRESNO GENERAL PLAN
CITY OF FRESNO
EIR NO. 10130**

**I. THIS NOTICE OF ENVIRONMENTAL IMPACT REPORT PREPARATION
SUPERCEDES TWO PREVIOUS NOTICES OF PREPARATION FOR
PREVIOUS EIR NO.10123**

The purpose of this discussion is to avoid confusion between earlier Notices of Preparation issued by the City for the Fresno General Plan Update. The present comprehensive update of the General Plan began in 1992. The Environmental Impact Report (EIR) process was begun at that time with the issuance of a Notice of Preparation in 1995; a log number was assigned by the State Clearinghouse as SCH#95092028. The Notice of Preparation was revised in August 1999, and distributed again. A Draft Environmental Impact Report was not prepared as a result of the 1999 Notice of Preparation. An amended Notice of Preparation was again issued in March of 2000, and a Draft EIR No. 10123 was prepared at that time, using the same State Clearinghouse log number, and distributed for public review from September 12, 2000 to November 1, 2000. A Final EIR, including responses to public comments received on the Draft EIR, was not certified by the Council of the City of Fresno.

The latest General Plan Update proposal, titled "Draft 2025 Fresno General Plan," reflects significant input received since the update effort began in 1992. In order to avoid confusion with past efforts, the Draft EIR resulting from this latest Notice of Preparation will be assigned a new log number, once this Notice of Preparation is received by the State Clearinghouse and will have a new City-issued EIR No. 10130 as noted above.

II. PROJECT DESCRIPTION

A. Project Location

The Draft 2025 Fresno General Plan encompasses approximately 162 square miles. The Fresno urban area is located along State Highway 99, approximately 170 miles south of Sacramento, and 110 miles north of Bakersfield.

Attached is a location map showing the City of Fresno's General Plan outer boundary, a regional location map, as well as the proposed Land Use and Circulation Map for the 2025 Fresno General Plan.

B. Proposed Project – General Plan Update, Corresponding Housing Element Update, Sphere of Influence Boundary Change, Corresponding Amendments to Various Community Plans, West Area Community Plan, Specific Plans and Parks/Trails Plans.

The General Plan in effect as of July 1, 2001 was originally adopted in 1984, and has been amended a number of times since then. Residential buildout of the

approximately 140 square miles of the present General Plan would result in a city of approximately 671,000 people.

Beginning in 1992, the Fresno City Council initiated a comprehensive update of the City's General Plan. This Notice of Preparation corresponds to the draft General Plan document prepared under the Council's direction.

Following are some of the significant changes and issues to be addressed in the "Draft 2025 Fresno General Plan", as compared to the 1984 Fresno General Plan presently in effect as of July 1, 2001:

- Increased urban land use density and intensity to accommodate the projected year 2025 population of 790,000 people and related employment growth.
- Increased emphasis upon efforts to enhance and revitalize established neighborhoods, commercial areas and the traditional downtown including achievement of specific urban core enhancement performance measures.
- Increased emphasis upon plan implementation programs and regional cooperation in land use and facility planning especially as related to the managed urban growth of the cities of Fresno and Clovis and the acknowledgement by the County of Fresno that planned expansions are appropriate and will be facilitated by adopted county policies.
- A 22-square mile expansion of the planned urban boundary and sphere of influence to accommodate approximately 65,000 people (8.2 percent of the projected year 2025 population).
- Establishment of an urban form concept comprised of activity centers and linear corridors that accommodate higher intensity and mixed-use developments.
- Corresponding amendments to all state mandated general plan elements, including significant revisions to the land use and circulation map as well as a comprehensive update of the Housing Element; corresponding amendments to all community plans including the Edison, Central Area, Roosevelt, Fresno High-Roeding, McLane, Bullard, Hoover and Woodward plans; necessary amendments to the Fresno Yosemite International Airport Environs and Specific Plan, Master Parks Plan and Master Trails Manual; and initiation and adoption of the West Area Community Plan.

Recipients of this Notice of Preparation are invited and encouraged to comment on any aspect of the City's General Plan Update process, as well as any environmental issues presented in this Notice of Preparation.

C. Streamlined Environmental Review for Subsequent Projects

The City of Fresno intends to streamline the California Environmental Quality Act (CEQA) process for subsequent projects which are found consistent with the new General Plan. Therefore, the General Plan will encourage and facilitate

“tiering” of environmental analysis, as that concept is defined in Section 15152 of the CEQA Guidelines.

The General Plan EIR may be prepared as a “Program EIR”, as defined in Section 15168 of the CEQA Guidelines, or as a “Master EIR”, as defined in Article 11.5 of the Guidelines, and/or Chapter 4.5 of the Public Resources Code. At the earliest opportunity, the City will determine the most appropriate type of document to be prepared. Advice and input from recipients of this Notice of Preparation is invited at this time as to the appropriate type of EIR format.

III. PROBABLE/POTENTIAL ENVIRONMENTAL EFFECTS

All recipients of this Notice of Preparation are invited to comment on the scope of any of the potential environmental impacts listed below. In addition, the city requests comments from particular public agencies, as specified in this section. A brief description of each environmental effect to be studied is as follows:

A. Population and Housing

The Draft 2025 Fresno General Plan is proposed to accommodate a higher population “holding capacity” than the present General Plan. The rate at which the Fresno population increases is a function of socioeconomic factors, housing availability, and other external variables. Several different public agencies have presented various population forecasts, using different growth assumptions. The EIR will analyze an appropriate growth forecast, which in turn will be used for traffic and air quality modeling, as well as input into the Housing Element.

B. Transportation/Traffic

Continued growth (residential and non-residential) of the community will increase the number of vehicle trips generated. This growth could lead to a reduction in the Level of Service (LOS) of certain segments of the local streets and state highway systems. The proposed increase in density and intensity of land uses in the urban area may require that certain road segments may need to be wider than what is presently proposed under the existing General Plan.

C. Air Quality

Due to continued growth in the Fresno-Clovis Metropolitan Area, air emissions from both mobile and stationary sources are expected to increase. The EIR will analyze this increase and review strategies to address these concerns in accordance with published guidelines from the San Joaquin Valley Unified Air Pollution Control District.

D. Long Term Water Supply

Section 15083.5 of the CEQA Guidelines requires the City to request certain information from the public water system serving the General Plan area.

This requested information includes: an indication of whether the projected water demand associated with the proposed General Plan was included in its last urban water management plan; and, an assessment "whether its total projected water supplies available during normal, single-dry, and multiple-dry water years as included in the 20-year projection contained in its urban water management plan will meet the projected water demand associated with the proposed project, in addition to the system's existing and planned future uses."

The water supply assessment received in response to this inquiry will be included in the General Plan EIR.

E. Agriculture Resources

Productive and potentially productive agricultural land could be lost to new urban uses. According to the Fresno County Planning and Resources Management Department, much of the agricultural land in the City of Fresno Sphere of Influence is under Williamson Act contracts which must be canceled prior to development. The EIR will address this issue as well as potential conflicts associated with the urban/rural interface which could result in the prohibition or restricted use of pesticides, noise and dust complaints and the competition for available groundwater supplies.

F. Utilities and Service Systems

Impacts upon sewer, water, solid waste, power and natural gas supplies and facilities are potentially significant unless major infrastructure improvements are so timed that they can accommodate planned development.

G. Public Services

Impacts upon public services, including but not limited to police and fire services, are potentially significant unless the expansion/improvement of services occurs at the same time as planned development.

H. Recreation

Future growth under the new General Plan could lead to increased use of existing neighborhood and regional parks or other recreational facilities such that the need for additional facilities may be accelerated. In addition, new recreational facilities to be constructed might lead to adverse impacts, depending on their design and operation. These issues will be studied in the EIR.

I. Biological Resources

The principal area of concern for biological resources is along the San Joaquin River corridor. There may be some impact upon biological resources (e.g., vernal pools) in the established areas as well as the new growth areas. These will be studied in the EIR.

J. Cultural Resources

Continued development may increase the potential for the removal of historic buildings and sites as well as other cultural resources. Effects to cultural resources are considered to be potentially significant.

K. Noise

The major source of noise in the Fresno community is traffic, particularly on roads adjacent to residential areas. Other sources of noise include railroads and the Sierra Skypark, Chandler Airport and Fresno/Yosemite International Airport. Sensitive noise receptors in the community include residential areas, hospitals, schools, and various health care facilities. With continued growth in the Fresno community, both noise generators as well as new sensitive noise receptors are expected to increase. The EIR will analyze this increase and present appropriate mitigation measures.

L. Hydrology and Water Quality

Development of vacant land could cause changes in water absorption rates, drainage patterns, or the rate and amount of surface runoff. In addition, flooding potential exists in the Fresno community. Finally, since the Fresno-Clovis Metropolitan Area relies primarily on the groundwater aquifer for its municipal water supply, water quality impacts to this aquifer must be minimized. The EIR will analyze these impacts.

M. Geology and Soils

The EIR will map and analyze potential hazards related to the existing geology within the Fresno community. Based on past investigations, geologic hazards are expected to be minimal.

N. Hazards and Hazardous Materials

Efforts to reduce hazardous wastes include recycling; enforcement of applicable regulations for identified uses that have the potential for hazardous wastes, and the remediation of hazardous waste sites. These efforts will be analyzed in the EIR.

O. Energy

Continued growth in the Fresno Area would increase the consumption of electrical and natural gas energy supplies and would require the siting of new facilities including transmission lines, substations, and the like. The EIR will evaluate energy resources.

P. Mineral Resources

Development would also increase the use of mineral resources. Policies included in the recently adopted Mineral Resource Element Update are intended to

provide better protection for areas classified as having regionally significant aggregate mineral deposits.

Q. Education

Population growth would increase the need for additional school facilities. To the degree permitted by the passage of the Leroy F. Greene Schools Facilities Act of 1998 (SB50), the EIR will address this issue.

R. Aesthetics

Urban form, building design, and commercial signage, among many other factors, affect the appearance and aesthetics of the city. The EIR will address those issues related to aesthetics and enforcement of city ordinances and policies related thereto.

S. Land Use and Planning

The EIR will address the issue of coordination of the 2025 Fresno General Plan with other jurisdictions in the region which provide policy directions for land use.

T. Cumulative Impacts

The EIR will address cumulative impacts with respect to Section 15130 of the CEQA Guidelines.

U. Growth Inducing Impacts

The EIR will discuss Growth Inducing Impacts with respect to Section 15126.2 (d) of the CEQA Guidelines.

V. Responding Parties May Identify Other Impacts

All agencies, parties and individuals responding to this Notice of Preparation are welcome to suggest any additional environmental impacts which should be included in the EIR.

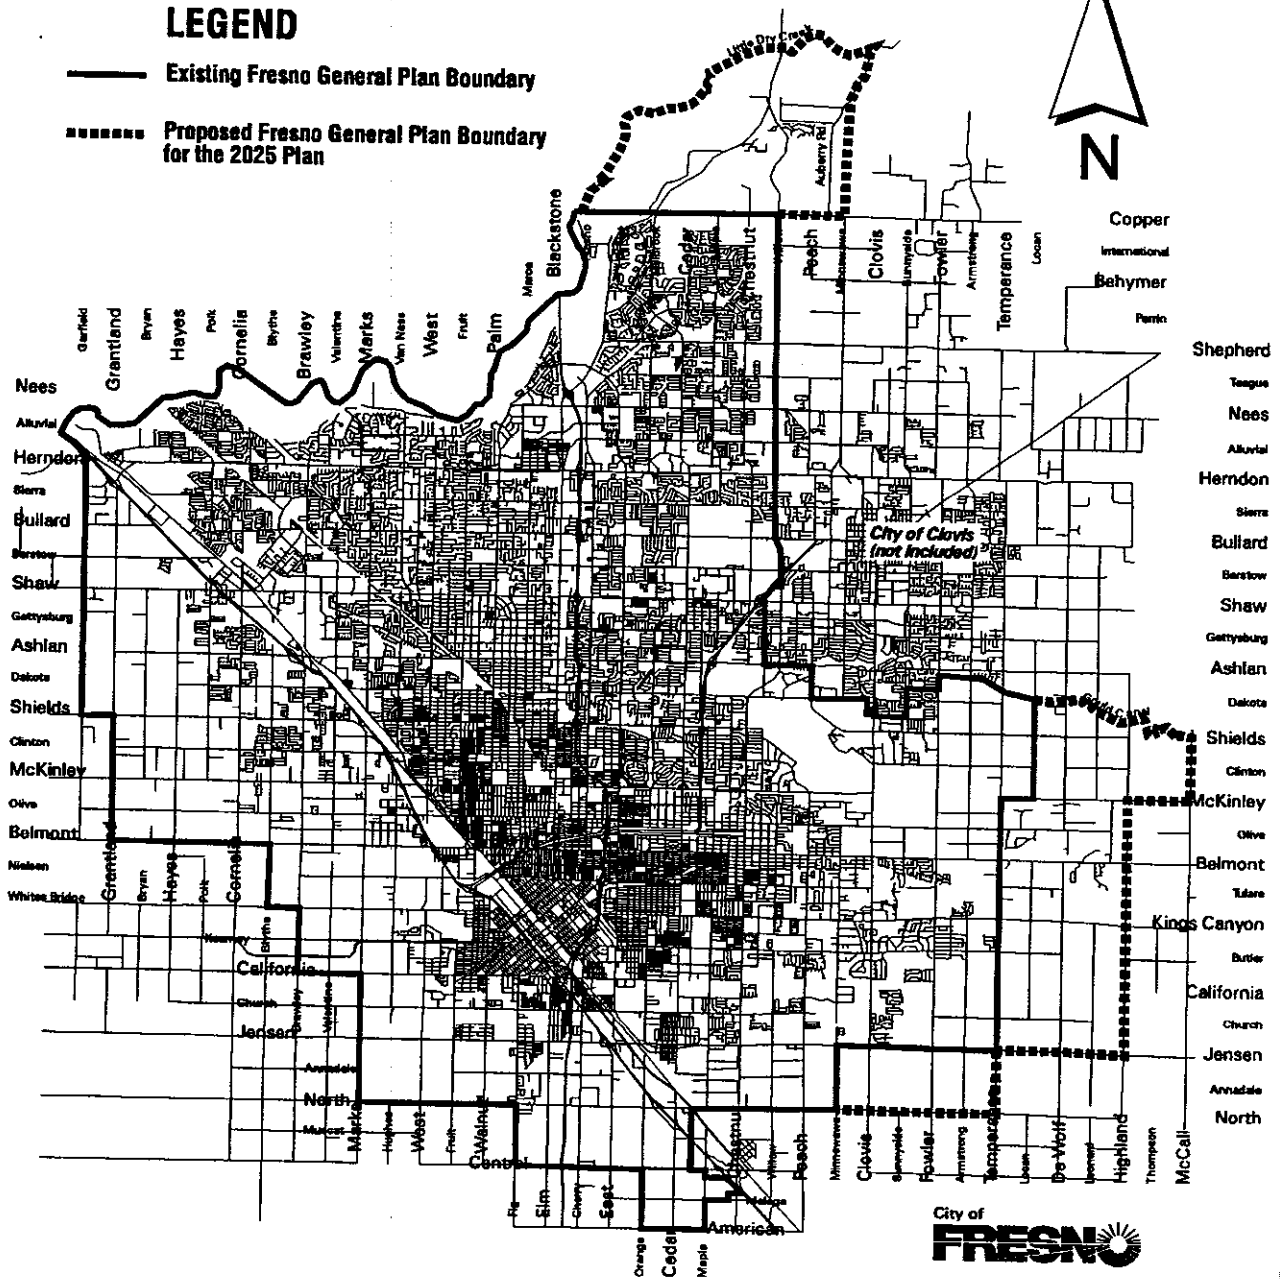

IV. **ALTERNATIVES**

As directed by Section 15126.6 of the CEQA Guidelines, the EIR will consider a reasonable range of alternatives to the proposed general plan update. The EIR shall seek to discuss alternatives which offer substantial environmental advantages over the Draft 2025 Fresno General Plan and which are feasible in light of economic, environmental, social, and technological factors. The no project alternative (i.e., development under the present 1984 General Plan) will be discussed along with the other alternatives. Responding agencies and individuals are encouraged to provide suggestions regarding alternatives.
